

**K6250 Model Introduction:** The environmentally friendly manual glue spraying machine independently designed and produced by K TWO can independently control functions such as power supply, lighting, fan, glue barrel pressure, atomization pressure, etc., making operation and maintenance simple and convenient. The model comes with filter cotton, which can effectively absorb and atomize excess glue, protecting the health of operators.

### Technical Parameters:

Model	K6250
Machine Weight	73KG
Package Weight	113KG
Dimensions	98*68*120(cm)
Packaging Size	105*75*134(cm)
Voltage	220V
Power	750W
Working Pressure	0.5MP

### Model Features:

- The functions of power supply, lighting, fan, rubber drum pressure, atomization pressure, etc. can all be independently controlled.
- Equipped with lighting, the operation details are clear and visible.
- The spray rate and range of the glue gun can be adjusted independently to meet your high requirements for glue spraying.
- Adopting advanced atomization technology can effectively reduce the volatilization of glue.
- Spray glue evenly, no longer manually scraping and applying repeatedly, avoid excessive use of glue, and improve work efficiency.
- Equipped with filter cotton, it can effectively absorb and atomize excess glue, protecting the health of operators.
- Supports both bagged and barreled adhesives, with strong compatibility, allowing for precise control of adhesive usage as needed to reduce waste.
