

K2C2-S Model Introduction: The K2C2-S model is the flagship model of the KTWO round knife thinning machine series, with a dual stepless speed regulation design that can handle thinning operations for various types of materials. Speed CNC control, easy and convenient to operate. In the leather goods industry such as handbags, phone cases, watch straps, and small leather items, the clothing industry such as leather jackets, the packaging industry such as leather gift boxes, the furniture industry such as leather sofas, the automotive industry such as car interiors and seats, basketball and badminton. Golf clubs and other sports equipment are widely used in the industry.

Technical Parameters:

Model	K2C2-S
Machine Weight	136KG
Dimensions	130*53*118(cm)
Minimum Thinning Thickness	0.05mm
Voltage	220V
Power	1.4KW
Drive Form	Dual drive type
Maximum Thinning Width	50mm
Package Weight	168KG

Optional Configuration:

- Various special presser feet
- Feeding slide table

Model Features:

- The touch screen adopts a storage design, which is easy to operate, simple and efficient.
- Integrated body design, equipped with advanced servo feeding system, ensuring constant torque output for both high and low speed feeding.
- Equipped with a built-in vacuum function, it can effectively remove waste and dust, prevent material jamming, and ensure a clean usage environment.
- The whole machine parts adopt high-precision machining technology, which is durable and has low noise.
- Equipped with KTWO's pioneering edge trimming function, it can directly input the required length for precise edge trimming.
- KTWO autonomous control program, stable and reliable.
- Digital dual infinite speed regulation can handle thinning of various types of materials.
- 7-inch touch screen, user-friendly control interface, can be operated without work experience.
- There are three operation modes: automatic mode, pedal mode, and jog mode, which can effectively handle the trimming of various shapes of materials.
- PLC control, with high precision and stability.
- Compatible with various special presser feet and modified accessories of KTWO, it can produce different edge thinning effects.
