

K7556 Model Introduction: The K7556 model, jointly launched by Ktwo and Amy Roke, is a co branded model based on the K7546 model. The new exterior design incorporates more practical elements. Provides a broader space for renovation.

Model Features:

- Support uniform thinning of soft and hard genuine leather materials.
- Leather below 320mm can be uniformly thinned.
- The maximum sheet thickness is 8 mm, the minimum sheet thickness is 0.2 mm.
- The body adopts integrated casting technology, which is smooth, stable and deformation free.
- Equipped with load-bearing wheels, it greatly facilitates the movement of the machine.
- Independent sharpening and vacuuming control can minimize usage noise to the greatest extent possible.
- Small volume design can maximize space saving.
- Equipped with load-bearing wheels, it greatly facilitates the movement of the machine.

Technical Parameters:

Model	K7556
Voltage	220 V
Power	1.65 KW
Working Size	320 mm
Blade Size	2020*40*0.5mm
Feeding Speed	Infinite speed regulation
Dimensions	97*67*120cm
Machine Weight	296 KG
Maximum Sheet Thickness	8mm
Minimum Sheet Thickness	0.2mm

Optional Configuration:

- Feeding roller
- Special device for trimming belts
- Rubber wrapped feeding wheel
