

K6093-S Model Introduction : K TWO K6093-S Fully Automatic Drying Machine is specifically designed for the drying and curing of edge paint and adhesive on leather goods such as leather products, bags, handbags, and belts. It is compatible with various materials including genuine leather, PU, PVC, and synthetic leather. The machine ensures fast and uniform drying of edge coating, enhances edge paint adhesion, and resolves common issues associated with traditional air drying, such as low efficiency and tackiness. Suitable for both small-to-medium batch production and large-scale manufacturing.

Technical Specifications

Model	K6093-S
Voltage	380 V
Power	15 KW
Dimensions	6030*930*860(mm)
Net Weight	557 KG

Machine Features

- ☆ Independent on/off switch and touchscreen control for simple, user-friendly operation.
- ☆ High-strength frame resists deformation, offers excellent load-bearing capacity, and ensures long service life.
- ☆ Fully enclosed internal design enables fast heat-up time with stable and precise temperature control.
- ☆ Internal hot air circulation ensures uniform heating of workpieces; drying temperature can be adjusted as needed.
- ☆ Fully automatic double-layer conveyor belt system with adjustable and stable transport speed.
- ☆ Tray-type conveying system for stable and efficient operation.
- ☆ Specifications and configurations can be customized according to production requirements.

Application Fields

- Leather goods industry such as handbags, wallets, watch straps, etc
- Leather clothing and other apparel industries
- High end women's shoes, men's shoes, hats and other shoes and hat industries
- High end leather gift boxes and other packaging industries
- High end home furnishing industries such as genuine leather sofas
